Green Initiative and Ecology System

NEC has always been at the forefront when it comes to technological innovations, many of which are related to environmental protection. Our green initiatives are responsible for lowering the energy consumption of products, complying with green manufacturing standards, eliminating chemicals that increase CO2 emissions and using chemicals that are environmentally safe (e.g. eliminating lead and mercury from circuit boards).
We are committed to the effective application of an environmental management system that meets ISO 14001:2004 requirements. We are reducing our consumption of materials in all operations and re-use materials wherever possible, by promoting recycling and the use of recycled products.

- Designs and specifications of this product is subject to change without prior notice.
- System features and terminal models may vary between countries, please consult with your local supplier/dealer for its availability.
